Att: Mr. Bob Schultz**

Dear Bob,

I would like to thank you and the staff at Automation & Control Technologies (ACT), for their work and commitment in providing Guardian Automotive Products Inc. the service and support needed to help reduce and manage cost on or motors, repairs, and spare parts program.

Guardian Automotive Products in the past used a similar program from Rockwell, however looking into ACT's RAMP program we found that ACT was more flexible on design of the program to meet the need of Guardian Automotive Products Inc. and as well as to offer other program benefits to GAP such as turnaround time on repairs, a complete tracking system of repairs and cost for each product. In all the overall program vs. Rockwell's program is more responsive and better fits the need of Guardian Automotive Products Inc. group.

Please feel free to use this letter as a recommendation for your services and your RAMP support program.

Sincerely,

**Timothy M. Johnson
Director of Purchasing
Guardian Automotive Products Inc.**
